# Package 'fitCTVARMx'

July 8, 2024
Title Fit the Continuous-Time Vector Autoregressive Model
Version 0.0.0.9000
<b>Description</b> Fit the continuous-time vector autoregressive model using the 'OpenMx' package.
<pre>URL https://github.com/jeksterslab/fitCTVARMx,</pre>
https://jeksterslab.github.io/fitCTVARMx/
BugReports https://github.com/jeksterslab/fitCTVARMx/issues
License MIT + file LICENSE
Encoding UTF-8
<b>Roxygen</b> list(markdown = TRUE)
VignetteBuilder knitr
<b>Depends</b> R ( $>= 3.0.0$ ), OpenMx
Imports stats
Suggests knitr, rmarkdown, testthat, simStateSpace
RoxygenNote 7.3.2
NeedsCompilation no

coef.fitctvaridmx Parameter Estimates

# Description

Parameter Estimates

# Usage

```
## S3 method for class 'fitctvaridmx'
coef(object, sigma = FALSE, theta = FALSE, ...)
```

# Arguments

object	Object of class fitctvaridmx.
sigma	$\label{logical.} Logical. \ If \ sigma = \ TRUE, include \ estimates \ of the \ sigma \ matrix, if \ available. \ If \ sigma = \ FALSE, exclude \ estimates \ of the \ sigma \ matrix.$
theta	$Logical.\ If\ the \verb ta  = \verb TRUE ,\ include\ estimates\ of\ the\ the \verb ta  a matrix,\ if\ available.\ If\ the \verb ta  = \verb FALSE ,\ exclude\ estimates\ of\ the\ the \verb ta  a matrix.$
	additional arguments.

# Value

Returns a list of vectors of parameter estimates.

# Author(s)

Ivan Jacob Agaloos Pesigan

coef.fitctvarmx Parameter Estimates

# **Description**

Parameter Estimates

# Usage

```
## S3 method for class 'fitctvarmx'
coef(object, sigma = FALSE, theta = FALSE, ...)
```

FitCTVARIDMx 3

# **Arguments**

object	Object of class fitctvarmx.
sigma	$\label{logical.} Logical. \ If \ sigma = \ TRUE, include \ estimates \ of the \ sigma \ matrix, if \ available. \ If \ sigma = \ FALSE, exclude \ estimates \ of the \ sigma \ matrix.$
theta	$Logical. \ If \ the \ ta = \ TRUE, include \ estimates \ of the \ the \ ta \ matrix, if \ available. \ If \ the \ ta = \ FALSE, exclude \ estimates \ of the \ the \ ta \ matrix.$
	additional arguments.

#### Value

Returns a vector of parameter estimates.

FitCTVARIDMX Fit the First Order Continuous-Time Vector Autoregressive Model by

# Description

Fit the First Order Continuous-Time Vector Autoregressive Model by ID

# Usage

```
FitCTVARIDMx(
  data,
  observed,
  id,
  time,
  phi_start = NULL,
  phi_lbound = NULL,
  phi_ubound = NULL,
  sigma_diag = TRUE,
  sigma_start = NULL,
  sigma_lbound = NULL,
  sigma_ubound = NULL,
  theta_fixed = TRUE,
  theta_start = NULL,
  theta_lbound = NULL,
  theta_ubound = NULL,
  mu0_fixed = TRUE,
  mu0_start = NULL,
  mu0_1bound = NULL,
  mu0\_ubound = NULL,
```

4 FitCTVARIDMx

```
sigma0_fixed = TRUE,
sigma0_diag = TRUE,
sigma0_start = NULL,
sigma0_lbound = NULL,
sigma0_ubound = NULL,
try = 1000,
ncores = NULL
```

# Arguments

sigma0\_diag

•	guineiros	
	data	Data frame. A data frame object of data for potentially multiple subjects that contain a column of subject ID numbers (i.e., an ID variable), and at least one column of observed values.
	observed	Character vector. A vector of character strings of the names of the observed variables in the data.
	id	Character string. A character string of the name of the ID variable in the data.
	time	Character string. A character string of the name of the TIME variable in the data.
	phi_start	Numeric matrix. Optional starting values for phi.
	phi_lbound	Numeric matrix. Optional lower bound for phi.
	phi_ubound	Numeric matrix. Optional upper bound for phi.
	sigma_diag	Logical. If sigma_diag = TRUE, sigma is a diagonal matrix.
	sigma_start	Numeric matrix. Optional starting values for sigma.
	sigma_lbound	Numeric matrix. Optional lower bound for sigma.
	sigma_ubound	Optional upper bound for sigma.
	theta_fixed	Logical. If theta_fixed = TRUE, the measurement error matrix theta is fixed to zero. If theta_fixed = FALSE, estimate the diagonal measurement error matrix theta.
	theta_start	Optional starting values for theta. Ignored if theta_fixed = TRUE.
	theta_lbound	Optional lower bound for theta. Ignored if theta_fixed = TRUE.
	theta_ubound	Optional upper bound for theta. Ignored if theta_fixed = TRUE.
	mu0_fixed	Logical. If mu0_fixed = TRUE, initial mean vector mu0 is fixed. If mu0_fixed = FALSE, initial mean vector mu0 is estimated.
	mu0_start	Optional starting values for mu0. If mu0_fixed = TRUE, mu0_start will be used as fixed values. If mu0_fixed = FALSE, mu0_start will be used as starting values.
	mu0_lbound	Optional lower bound for mu0. Ignored if mu0_fixed = TRUE.
	mu0_ubound	Optional upper bound for mu0. Ignored if mu0_fixed = TRUE.
	sigma0_fixed	Logical. If sigma0_fixed = TRUE, initial mean vector sigma0 is fixed. If sigma0_fixed = FALSE, initial mean vector sigma0 is estimated.

Logical. If sigma0\_diag = TRUE, sigma0 is a diagonal matrix.

FitCTVARIDMx 5

sigma0_start	Optional starting values for sigma0. If sigma0_fixed = TRUE, sigma0_start will be used as fixed values. If sigma0_fixed = FALSE, sigma0_start will be used as starting values.
sigma0_lbound	Optional lower bound for sigma0. Ignored if sigma0_fixed = TRUE.
sigma0_ubound	Optional upper bound for sigma0. Ignored if sigma0_fixed = TRUE.
try	Positive integer. Number of extra optimization tries.
ncores	Positive integer. Number of cores to use.

```

# Arguments

data	Data frame. A data frame object of data for potentially multiple subjects that contain a column of subject ID numbers (i.e., an ID variable), and at least one column of observed values.
observed	Character vector. A vector of character strings of the names of the observed variables in the data.
id	Character string. A character string of the name of the ID variable in the data.
time	Character string. A character string of the name of the TIME variable in the data.
phi_start	Numeric matrix. Optional starting values for phi.
phi_lbound	Numeric matrix. Optional lower bound for phi.
phi_ubound	Numeric matrix. Optional upper bound for phi.
sigma_diag	Logical. If sigma_diag = TRUE, sigma is a diagonal matrix.
sigma_start	Numeric matrix. Optional starting values for sigma.
sigma_lbound	Numeric matrix. Optional lower bound for sigma.
sigma_ubound	Optional upper bound for sigma.
theta_fixed	Logical. If theta_fixed = TRUE, the measurement error matrix theta is fixed to zero. If theta_fixed = FALSE, estimate the diagonal measurement error matrix theta.
theta_start	Optional starting values for theta. Ignored if theta_fixed = TRUE.
theta_lbound	Optional lower bound for theta. Ignored if theta_fixed = TRUE.
theta_ubound	Optional upper bound for theta. Ignored if theta_fixed = TRUE.
mu0_fixed	Logical. If mu0_fixed = TRUE, initial mean vector mu0 is fixed. If mu0_fixed = FALSE, initial mean vector mu0 is estimated.
mu0_start	Optional starting values for mu0. If mu0_fixed = TRUE, mu0_start will be used as fixed values. If mu0_fixed = FALSE, mu0_start will be used as starting values.
mu0_lbound	Optional lower bound for mu0. Ignored if mu0_fixed = TRUE.
mu0_ubound	Optional upper bound for mu0. Ignored if mu0_fixed = TRUE.

8 FitCTVARMx

sigma0_fixed	Logical. If sigma0_fixed = TRUE, initial mean vector sigma0 is fixed. If sigma0_fixed = FALSE, initial mean vector sigma0 is estimated.
sigma0_diag	Logical. If sigma0_diag = TRUE, sigma0 is a diagonal matrix.
sigma0_start	Optional starting values for sigma0. If sigma0_fixed = TRUE, sigma0_start will be used as fixed values. If sigma0_fixed = FALSE, sigma0_start will be used as starting values.
sigma0_lbound	Optional lower bound for sigma0. Ignored if sigma0_fixed = TRUE.
sigma0_ubound	Optional upper bound for sigma0. Ignored if sigma0_fixed = TRUE.
try	Positive integer. Number of extra optimization tries.
ncores	Positive integer. Number of cores to use.

#### Value

Returns an object of class fitctvarmx which is a list with the following elements:

```
call Function call.

args List of function arguments.

fun Function used ("FitCTVARMx").

output A fitted OpenMx model.
```

Sampling Covariance Matrix of the Parameter Estimates

# **Description**

Sampling Covariance Matrix of the Parameter Estimates

#### Usage

```
## S3 method for class 'fitctvaridmx'
vcov(object, sigma = FALSE, theta = FALSE, ...)
```

#### **Arguments**

object Object of class fitctvaridmx.

sigma Logical. If sigma = TRUE, include estimates of the sigma matrix, if available. If

sigma = FALSE, exclude estimates of the sigma matrix.

theta Logical. If theta = TRUE, include estimates of the theta matrix, if available. If

theta = FALSE, exclude estimates of the theta matrix.

... additional arguments.

#### Value

Returns a list of sampling variance-covariance matrices.
